

SANAKO Study 1200 Language Learning Software - Light, Dynamic, Wireless

Interactive teaching software from SANAKO makes language teaching easy and productive at all levels. Our breakthrough software is light and dynamic – there is no proprietary hardware to invest in, and the systems is flexible and fully scalable to meet teaching needs in large or small environments – simply install the software on as many or as few student PCs as you need, and your language teaching environment is ready! You can use Study 1200 to set up a specialized language teaching system, or install it on top of existing IT resources to introduce language learning capabilities - no dedicated space is needed!

Additional software modules may be installed as needed to introduce specific teaching and learning activities, and the system is suitable for use in wireless LAN environments*. SANAKO Study 1200 is an advanced language learning solution. In addition to listening-based exercises such as listening comprehension, it offers intensive learning activities that focus on voice practice. The digital recorder supports student voice recording for model imitation, reading practice and mark to speak, for thorough drilling in pronunciation, intonation, inflexion and even accent reduction. Study 1200 can be considered a modern, software version of the Audio Active Comparative system (AAC).

Engage, Interact, Monitor

SANAKO Study 1200 Language Learning Software

Modernize traditional favorites...

SANAKO Study 1200 language teaching software is powerful, innovative and progressive. It makes use of modern methods and resources to deliver new and traditional learning activities with maximum impact.

Use the latest technology

Because the software draws on IT and Internet resources, teachers can modernize their language programs by incorporating contemporary Microsoft® Office tools such as PowerPoint® to create innovative learning activities; the Internet may also be incorporated into learning to appeal to modern learners. Moreover, the content authoring tool in Study 1200 gives teachers the flexibility to use text, images, audio and video to create new learning material.

Reinforce learning

Teachers can use communication tools that are familiar to their students, such as text messaging or chat, to communicate with them in an engaging way, and to reinforce learning by creating more opportunities to interact in the target language.

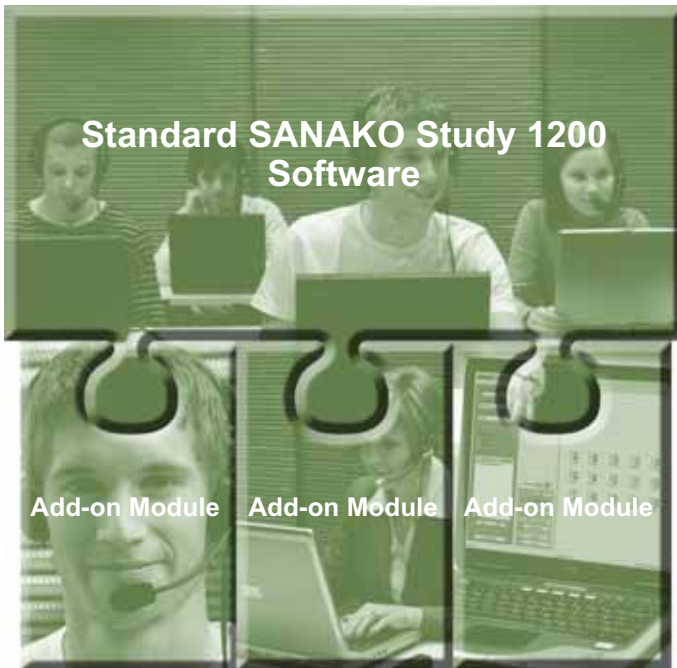

Stay in control

New ways of learning and interacting in the classroom demand new ways of managing student activity. SANAKO's software language learning solution keeps teachers firmly at the center of learning activity with a suite of classroom management tools: control web browsing; manage chat sessions; monitor students' on-screen work and activities; black out screens; lock cursors and keyboards to focus attention on a given task; shut down, log off or restart student computers – there's no doubt who's in charge of this classroom!

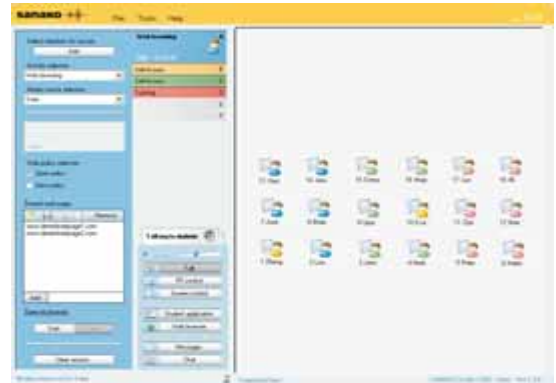

Teach with software that's approachable

Teachers will be perfectly at ease using our teaching software, as the interfaces are user-friendly and activity-driven, so that activities that are not in use cannot be accidentally selected to confuse the teacher and disrupt the lesson. No specialized IT skills are needed in the comfortable teaching and learning environment provided by our software.

or, Motivate, Succeed!

SANAKO Study 1200 software's modular design

Fits right in with existing IT resources

The intelligent design of the new software ensures that it's compatible with the latest commonly used computer operating systems, and with everyday usage tools such as Microsoft® Word that are available in most IT environments. The software will also seek out updates online to ensure that it offers the maximum performance.

Add modules to do more!

With the modular design of the Sanako software language learning solution, teachers can enhance their IT classroom teaching activities by installing add-on modules with specific functionalities. These enhancement modules allow teachers to introduce new drills and activities to make their learning programs more effective. Modules such as the Workflow Module, due for release early in 2006, improve teachers' administrative or classroom management capabilities.

Track learning progress

SANAKO Study 1200 provides teachers with a number of methods for evaluating student performance and tracking their progress. Use writing, listening, recorded and Web-based activities to stimulate learners to make use of their growing oral and written language skills, store results for comparison over time, so the teacher and students can measure progress.

Ensure the best learning results

Study 1200 gives students access to resources for independent or supplemental learning and study. This unique learning-on-demand feature creates additional learning opportunities and reinforces classroom activity.

Your key to a whole school teaching solution

The SANAKO Study group of teaching solutions provides a reliable, user-friendly and expandable foundation for the use of IT, multimedia, the Internet and various collaboration tools in the teaching of languages and other subjects. With simple interfaces and activity-led functions, all of our teaching software can easily be used by all teachers; they're also suitable for teaching students at all levels. What's more, each Study software teaching solution can be enhanced with the addition of plug-in modules that introduce focused learning or teaching activities. All software solutions in this group are compatible with the latest Microsoft® operating systems, and may all be used in wireless environments*.
